ASSIGNMENT TWO

Your first project will be to create a 15-20 sec. ‘Video Postcard’ which represents your concept of home or your hometown.

Some ideas:

It can tell a visual story about several aspects of ‘Home’ or where you’re from.
It can represent your changing vision of ‘Home’ through past present and future.
It can be a non personal and purely theoretical representation of ‘Home’
It can be a humorous invitation into the world of your apartment. etc.

How you tell the story and what you tell us about is up to you.

You can use any combination of text and imagery. (Quotes, poetry, etc.)
It can be purely typographical.
It can be a collection of artfully composed video clips or photographs.
It can be purely illustration.

Or, it can be a combination of all of the above.

PART TWO:

Now that you have a swipe collection of researched images, think about your project and what it will look like. Create one Style Frame which you will bring into class next week. The frame will be one static composition or frame of your piece created in Illustrator or Photoshop which you will print out and present to the class.

Consider the type of images you will use. What style of illustration, photography and/or typography will you use? What colors or textures will be present in your piece?

Use a 16:9 (widescreen) format for your frame so that it will translate directly to your finished piece. I suggest using a frame size of 1280 pixels x 720 pixels
